CARRIER OBJECTIVE

Aim to work in a challenging work environment where I can utilize my expertise in technical skills, towards the development and implementation of the new ideas, contributing to growth of the organization.

PROJECTS

Shopping Site

The project Shopping Site has been developed on HTML, PHP, CSS, JavaScript, and My SQL. The objective of this project is to create an e-commerce web portal An online shopping store that will allow customers to buy fashionable clothes without wasting their precious time.

To make the shopping easier and comfortable and To reach the products to the customers address with great care To represent as a competitor in the e-commerce of India.

The web portal will have an online interface in the form of an e-commerce website that will allow users to buy goods from the Shopping Site. There are two types of users available in the project. The first one is Customer and the second one is the Admin. Customers users have limited access right to access the system while the admin users have full control over the system. I have used PHP for business logic, MySQL as a database, HTML for structure designing, CSS for web page formatting, JavaScript for form validation and animation.

TECHNICAL STRENGTHS

Language

PHP, Python, JAVA, C#
